Professional Summary

B.Tech Information Technology student interested in cybersecurity and network security. Building hands-on experience through internships, lab practice, and a personal project involving network scanning and traffic analysis with Nmap, Wireshark, and Kali Linux. Also a Google Gemini Student Ambassador.

Experience

Cybersecurity Intern October 2026 – Present
Networkwalks IT Solutions & Training *Remote*

- Undergoing structured training in network security and information security fundamentals, with hands-on learning activities.

Google Gemini Student Ambassador May 2026 – Present
Google *Remote*

- Represent Google Gemini on campus, introducing fellow students to AI tools for learning and productivity.
- Support campus activities and product demonstrations to help students find practical uses for Google's AI tools.

Cybersecurity Virtual Intern March 2026 – April 2026
VOIS (Vodafone Intelligent Solutions) – Edunet Foundation *Remote*

- Performed network reconnaissance and host discovery with Nmap to identify open ports, running services, and potential attack surfaces in simulated lab environments.
- Captured and analyzed network traffic with Wireshark to spot anomalous behavior and understand TCP/IP communication.
- Completed guided browser-exploitation exercises with BeEF to study client-side attack vectors and strengthen defensive awareness.

Projects

Network Port Scanner | Python github.com/suryanshsec07/port-scanner

- Built a multithreaded port scanner with a GUI that scans custom port ranges on target IP addresses and hostnames.
- Displays open ports with their service names in real time, using concurrent threads for faster scans.
- Added result logging to export open-port findings to a text file for documentation and reporting.

Education

Ajay Kumar Garg Engineering College 2025 – 2029
B.Tech, Information Technology (AKTU) *Ghaziabad, Uttar Pradesh, India*

Certifications & Training

- Pre-Security – TryHackMe
- Cybersecurity Analyst Job Simulation – Tata (Forage)
- Introduction to Cybersecurity – Cisco Networking Academy
- Programming in Python – CodeSquadz

Technical Skills

Languages: C, Python
Security Tools: Nmap, Wireshark, BeEF
Operating Systems: Kali Linux, Windows
Areas: Network Security, Network Scanning, Traffic Analysis, Vulnerability Assessment (basic)
Platforms: TryHackMe, GitHub

Additional

Practicing cybersecurity labs on TryHackMe covering network scanning, enumeration, privilege escalation, and basic exploitation.
