SUMMARY

B.Tech Information Technology student specializing in cybersecurity with hands-on experience in network scanning, traffic analysis, and vulnerability assessment. Currently serving as **Google Student Ambassador**, driving AI adoption and campus tech initiatives. Proficient in industry-standard security tools including Nmap, Wireshark, BeEF, and Kali Linux, with practical project experience in AI-powered security applications.

EXPERIENCE

Google Student Ambassador

May 2026 – Present

Google

Remote

- Represent Google Gemini on campus as a student advocate, promoting AI tool adoption among peers and faculty.
- Organize workshops and live demonstrations to showcase Gemini's capabilities in productivity and academic use cases.
- Acting as Google's student representative for AI tools.

Cybersecurity Virtual Intern

March 2026 – April 2026

VOIS (Vodafone Intelligent Solutions) – Edunet Foundation

Remote

- Conducted network reconnaissance and host discovery using Nmap, identifying open ports, running services, and potential attack surfaces across simulated lab environments.
- Performed network traffic capture and packet analysis with Wireshark to detect anomalous behavior and understand TCP/IP communication protocols.
- Executed browser exploitation exercises using BeEF (Browser Exploitation Framework) to study client-side attack vectors and improve defensive security awareness.

PROJECTS

Network Port Scanner | github.com/suryacysec/port-scanner

- Developed a multithreaded Python port scanner with a GUI to scan custom port ranges across target IP addresses and hostnames.
- Displays open ports alongside associated service names in real time with concurrent threading for fast scan performance.
- Implemented result logging feature to export open port findings to a text file for documentation and reporting.

EDUCATION

Ajay Kumar Garg Engineering College

2025 – 2029

Bachelor of Technology (B.Tech), Information Technology

Ghaziabad, Uttar Pradesh, India

CERTIFICATIONS

Pre-Security – TryHackMe

Introduction to Cybersecurity – Cisco Networking Academy

Generative AI Essentials – (AI for All Program, MPIT-CoE & TCS iON)

Cybersecurity Analyst Job Simulation – Tata (Forage)

TECHNICAL SKILLS

Languages: C, Python

Security Tools: Nmap, Wireshark, BeEF, Kali Linux

Operating Systems: Kali Linux, Windows

Domains: Network Security, Vulnerability Assessment, Threat Analysis, Traffic Analysis

Platforms: TryHackMe, GitHub

ADDITIONAL

Actively practicing cybersecurity labs on TryHackMe focused on network scanning, enumeration, privilege escalation, and basic exploitation techniques.
